

JOB OPPORTUNITY 1021-2020

The Leibniz-Institut für Wissensmedien (IWM) focuses on research on knowledge acquisition, knowledge sharing and cooperation with digital media. The IWM is part of the Leibniz Association and is committed to international standards of excellent science.

We are searching for a committed

Researcher (PhD student, 36 months)

starting November 1, 2020 or later for a research project on the cognitive processes underlying learning with text and pictures (funded by the Deutsche Forschungsgemeinschaft). The employment level in the research project is 65%. In addition to the work in the research project, conducting a PhD in the above-mentioned subject area is desired and is strongly supported.

Your tasks:

- Planning and conducting empirical studies, analyzing data, and documentation of results
- Presentation of the research results at national and international conferences
- Publication and documentation of research results in relevant journals

Your profile:

- Strong interest in the cognitive processes underlying learning with text and pictures
- Experience in planning and conducting empirical studies and analyzing data
- Master degree in psychology or a related field
- Very good English skills

We offer:

- Integration into an innovative project and further research activities of the institute
- A cooperative team and individual support
- PhD education in methods and soft skills and an inspiring academic environment
- An attractive remuneration package (TV-L E13, 65%, gross salary p.a.: 1st year EUR 32,518, from 2nd year EUR 35,177)
- Allowances for participation in German language courses as well as for professional child care
