

A PhD position is available at the Department of Psychology, School of Medicine and Health Sciences of the University of Oldenburg, Germany. The appointment is available immediately for three years.

PhD position (65% of full time German TV-L E13, 3 years).

We are seeking a highly motivated candidate with an above average academic university degree in psychology, cognitive science or a related field and good skills in oral and written English and German. Advanced knowledge in at least one the following fields is required: Analyses of neuroimaging data or excellent programming skills. Work experience with patients is a plus.

The candidate will collect MRI and neuropsychological data in patients with brain tumors and perform advanced MRI analyses (structural and functional connectivity, task-related analyses). The project will be conducted in an interdisciplinary collaborative research consortium of the Department of Psychology and the Department of Pediatrics and Pediatric Hematology / Oncology. The Department of Psychology offers access to state-of-the-art brain imaging (MRI, NIRS, EEG and MEG), and computational facilities.

The University of Oldenburg is dedicated to increase the percentage of female employees in the field of science. Therefore, female candidates are particularly encouraged to apply. In accordance to § 21 Section 3 NHG, female candidates with equal qualifications will be preferentially considered. Applicants with disabilities will be given preference in case of equal qualification. Please send your application including a CV, list of two potential referees, a brief statement of research interests and copies of certificates of academic grades to Prof. Dr. Christiane M. Thiel, Department of Psychology, University of Oldenburg, 26111 Oldenburg, Germany; (christiane.thiel@uni-oldenburg.de). Electronic applications (one pdf file) are preferred. The application deadline is 16.09.2018.
